

Age Progression

Step 1

■ FACES has over 400 facial features exclusively created to age composites. These features can be found under 5 categories: forehead lines, eye lines, smile lines, mouth lines and chin lines. Picking from these categories will allow a composite of a young person to be aged up to 50 years and vice versa.

In this tutorial, I will age a person approximately 20 years but keep in mind that our database of features supports up to 50 years of aging. The BAC id for this exercise is:

79dNCjdJvC93wLJ6RCRiodFM6EPfeEGrzNM
HYr02CD+9zyBDZSghVxo1

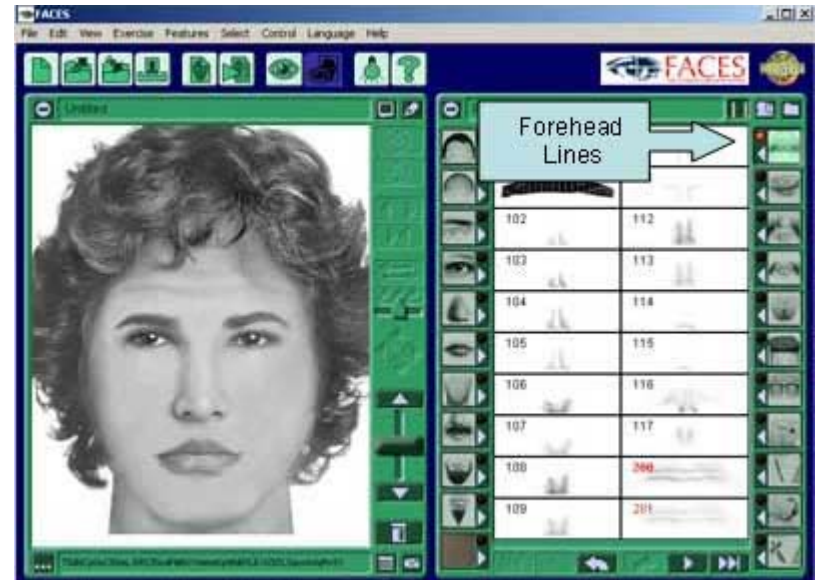

1. First create a simple composite like the one shown below.

Step 2

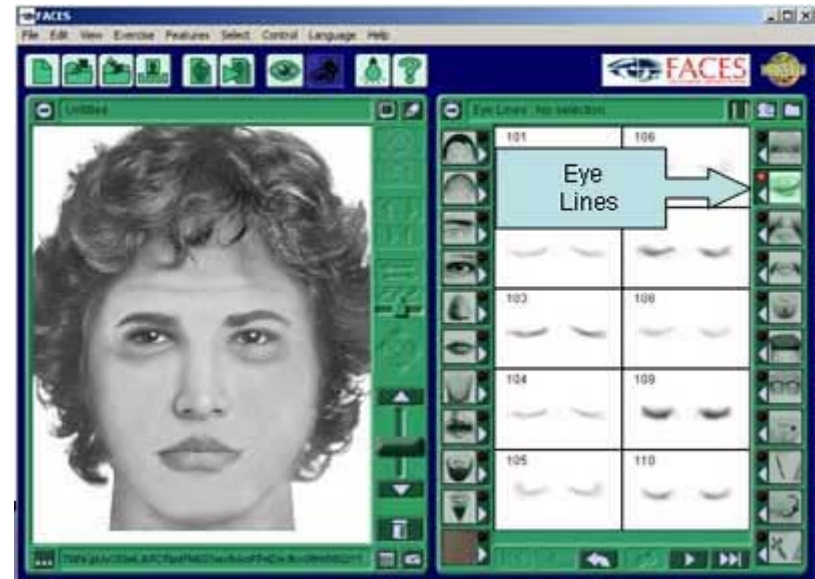

- Now, select the forehead lines category and pick a feature

Step 3

- Select the eye lines category and pick another feature

Step 4

- Select the smile line category and pick another feature.

Step 5

- Select the mouth lines category and pick another feature.

Step 6

- Lastly, select the chin lines category and pick another feature.

Final Results
